EXHIBIT A - Drug Medi-Cal - Organized Delivery System

FISCAL YEAR 2020-2021

The Drug Medi-Cal Organized Delivery System (DMC-ODS) is a pilot program to test a new paradigm for the organized delivery of health care services for Medicaid eligible individuals with a Substance Use Disorder (SUD). DMC-ODS has the potential to address the aforementioned limitations on California's DMC-funded services. It will provide access to treatment modalities and services previously not covered by DMC benefits, making available a full continuum of evidence-based SUD treatment and thus increasing the likelihood that beneficiaries will be able to achieve and sustain long-term recovery.

In addition, DMC-ODS will facilitate increased coordination and integration of SUD services with physical health and mental health care, potentially leading to improved clinical and fiscal outcomes. Furthermore, by enhancing counties' ability to selectively contract with providers and expanding the provider types included in the SUD workforce, DMC-ODS can address limitations that have hampered the delivery of effective SUD services to Medi-Cal beneficiaries. Consequently, it is anticipated that the implementation of DMC-ODS will lead to improvements in four key areas: (1) access to care, (2) quality of care, (3) cost, and (4) the integration and coordination of SUD care, both within the SUD system and with medical and mental health services.

ASAM Criteria is a collection of objective guidelines that give clinicians a way to standardize treatment planning and where patients are placed in treatment, as well as how to provide continuing, integrated care and ongoing service planning. The criteria were developed by the American Society of Addiction Medicine (ASAM), and presented in a book written by a group of renowned doctors and professionals, working in a variety of mental health and addiction treatment fields. The ASAM Criteria has become the most widely used set of criteria in the United States for the treatment of substance-use issues, and it has been continually revised and updated over the years with the newest science in the field of addiction. The ASAM Criteria has been in use since 1991, and its foundations extend back even further into history. The ASAM Criteria specifies that a professional can use a reference tool such as the Diagnostic and Statistical Manual of Mental Disorders Fifth Edition (DSM-V) to determine if beneficiaries meet medical necessity criteria. Services available through DMC-ODS, through the use of the ASAM criteria include:

- A. 5 Early Intervention
- B. 1 - Outpatient Services
- C. 2.1 - Intensive Outpatient Services
- D. 2.5 - Partial Hospitalization
- E. 3.1 - Clinically Managed Low-intensity Residential Services
- F. 3.3 - Clinically Managed Population-specific High-intensity Residential Services
- G. 3.5 - Clinically Managed High-intensity Residential Services
- H. 3.7 - Medically Monitored Intensive Inpatient Services
- I. 4.0 - Medically Managed Intensive Inpatient Services
- J. I-WM - Ambulatory Withdrawal Management without Extended On-site Monitoring
- K. 2-WM - Ambulatory Withdrawal Management with Extended On-site Monitoring
- L. 3.2-WM- Clinically Managed Residential Withdrawal Management
- M. 3.7-WM-Medically Monitored Inpatient Withdrawal Management
- N. 4-WM - Medically Managed Intensive Inpatient Withdrawal Management
- O. Recovery Services
- P. Case Management
- Q. Physician Consultation
- R. Additional Medication Assisted Treatment (MAT)
- S. Partial Hospitalization

It is highly encouraged that CONTRACTOR reaches out to community-based organizations and other county resources to maximize CONTRACTOR's services. It is the responsibility of CONTRACTOR to highlight resources available by CONTRACTOR for the community. Beneficiaries have the ability to seek SUD services with CONTRACTOR without prior COUNTY approval, except for residential services, which require a Treatment Authorization Request (TAR) by COUNTY.
